

ASI Jewelry Enterprise

Complete Enterprise System Specifically Designed For Jewelry Manufacturing

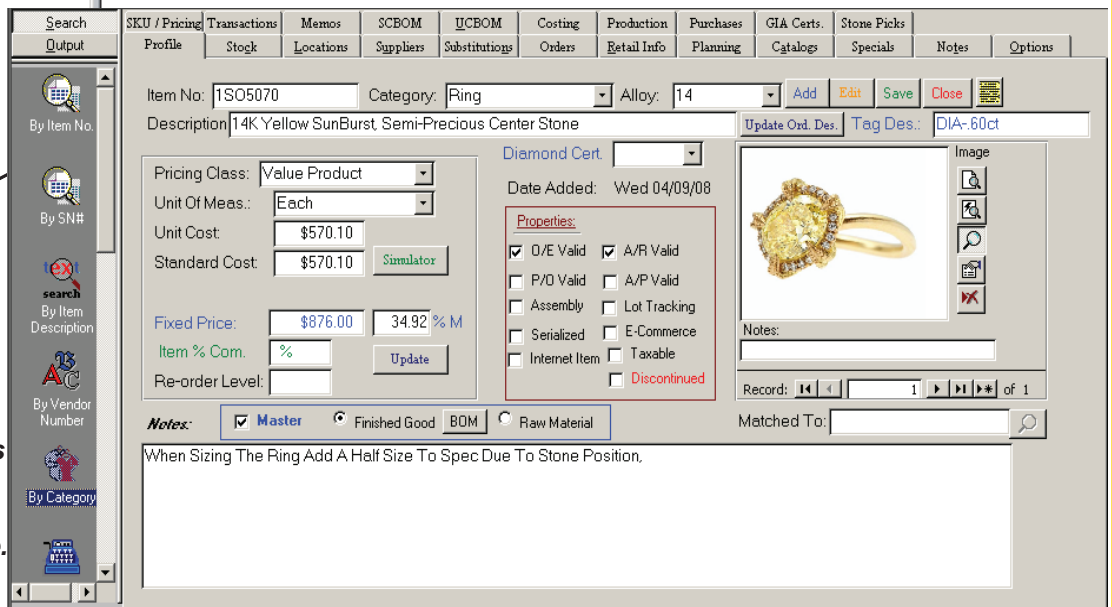

Full Menu for Jewelry System

This is a module based system. You can chose which features and modules each user will have installed and access to accordingly.

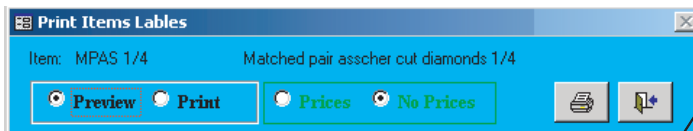

Item master & Tabs

The Item master allows complete access to all related information. Stock tab shows inventory values within your stock and salesman lines. SKU/Pricing allows pricing matrix for customers based on quantity or contract price. SCBOM is the standard cost Bill of Materials.

Item images can be used in any desired Report, Quote, Order or Invoice.

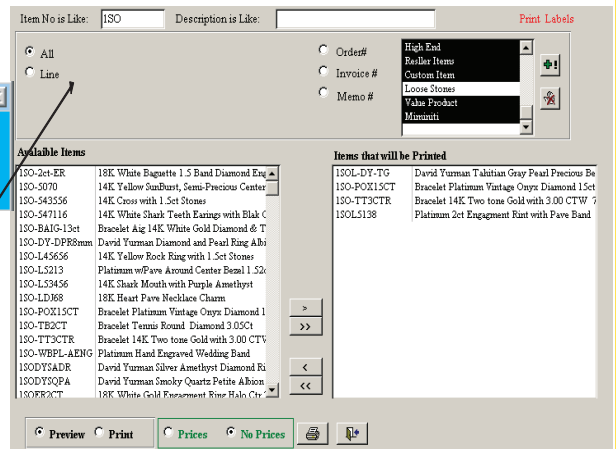

Memos are viewed and tracked as well as Orders, Customer Purchases & Production Status can be viewed and tracked.

Print individual butterfly labels or bulk by Salesman Line, Invoice, Order or Memo.

Some Key Benefits.

- * Very robust full Accounting Enterprise System.
- * Complete unlimited customer & vendor histories of invoices, orders, memos and transactions.
- * Microsoft SQL Server back end database.
- * Automatic reminders and/or notices to any specification.
- * Fully Secured Remote Access
- * Global Price changing for precious metal cost
- * Monthly Rapaport import function diamond costing.
